CONTENTS OF VOLUME 47

Number 1

C. I. A. THOMSON, M. J. WORSWICK, A. K. PILKEY, D. J. LLOYD and G. BURGER	1	Modeling void nucleation and growth within periodic clusters of particles
F. L. CARRANZA and R. B. HABER	27	A numerical study of intergranular fracture and oxygen embrittlement in an elastic-viscoplastic solid
G. H. M. VAN DER HEIJDEN, A. R. CHAMPNEYS and J. M. T. THOMPSON	59	Spatially complex localisation in twisted elastic rods constrained to lie in the plane
T. ZHU and W. YANG	81	Fatigue crack growth in ferroelectrics driven by cyclic electric loading
P. ONCK and E. VAN DER GIESSEN	99	Growth of an initially sharp crack by grain boundary cavitation
S.-C. NGAN and L. TRUSKINOVSKY	141	Thermal trapping and kinetics of martensitic-phase boundaries
Y. W. ZHANG, A. F. BOWER, L. XIA and C. F. SHIH	173	Three dimensional finite element analysis of the evolution of voids and thin films by strain and electromigration induced surface diffusion
	I	Keywords

Number 2

R. J. M. SMIT, W. A. M. BREKELMANS and H. E. H. MEIJER	201	Predictions of the large-strain mechanical response of heterogeneous polymer systems: local and global deformation behaviour of a representative volume element of voided polycarbonate
J. G. SWADENER, K. M. LIECHTI and A. L. de LOZANNE	223	The intrinsic toughness and adhesion mechanisms of a glass/epoxy interface

C. Q. RU	259	Three-phase elliptical inclusions with internal uniform hydrostatic stresses
E. RADI, D. BIGONI and A. TRALLI	275	On uniqueness for frictional contact rate problems
J. Y. SHU and N. A. FLECK	297	Strain gradient crystal plasticity: size-dependent deformation of bicrystals
S. BASU and R. NARASIMHAN	325	A finite element study of the effects of material characteristics and crack tip constraint on dynamic ductile fracture initiation
C. Y. CHEN and C. ATKINSON	351	On interface dislocations between dissimilar materials with non-linear stress–strain laws (mode 3 analysis)
A. H. ENGLAND and P. W. GREGORY	371	Finite lateral compression of an elastic–plastic fibre-reinforced tube: loading solutions
M. ORTIZ and E. A. REPETTO	397	Nonconvex energy minimization and dislocation structures in ductile single crystals
	463	Erratum
	I	Keywords

Number 3

J. HE, I. J. BEYERLEIN and D. R. CLARKE	465	Load transfer from broken fibers in continuous fiber Al_2O_3—Al composites and dependence on local volume fraction
B. LORET and E. RIZZI	503	Strain localization in fluid-saturated anisotropic elastic–plastic porous media with double porosity
K. BHATTACHARYA and R. D. JAMES	531	A theory of thin films of martensitic materials with applications to microactuators
S. MASTILOVIC and D. KRAJCINOVIC	577	High-velocity expansion of a cavity within a brittle material
V. B. SHENOY, R. MILLER, E. B. TADMOR, D. RODNEY, R. PHILLIPS and M. ORTIZ	611	An adaptive finite element approach to atomic-scale mechanics—the quasicontinuum method
M. ALVES and N. JONES	643	Influence of hydrostatic stress on failure of axisymmetric notched specimens

N. J. MILLS and H. X. ZHU 669 The high strain compression of closed-cell polymer foams

I Keywords

Number 4

M. ORTIZ, E. A. REPETTO and H. SI 697 A continuum model of kinetic roughening and coarsening in thin films

M. A. KELMANSON and S. B. MAUNDER 731 Modelling high-velocity impact phenomena using unstructured dynamically-adaptive Eulerian meshes

G. Q. CHEN, T. J. AHRENS, W. YANG and J. K. KNOWLES 763 Effect of irreversible phase change on shock-wave propagation

B. STORÅKERS, N. A. FLECK and R. M. McMEEKING 785 The viscoplastic compaction of composite powders

R. ARIAS and F. LUND 817 Elastic fields of stationary and moving dislocations in three-dimensional finite samples

A. C. STEENBRINK and E. VAN DER GIESSEN 843 On cavitation, post-cavitation and yield in amorphous polymer–rubber blends

B. SHAFIRO and M. KACHANOV 877 Solids with non-spherical cavities: simplified representations of cavity compliance tensors and the overall anisotropy

G. J. DVORAK and M. V. SRINIVAS 899 New estimates of overall properties of heterogeneous solids

R. HILL 921 Plastic deformation and instability in thin-walled tubes under combined loading: a general theory. Part II

T. H. SEELIG and D. GROSS 935 On the interaction and branching of fast running cracksîa numerical investigation

L. P. MIKKELSEN and V. TVERGAARD 953 A nonlocal two-dimensional analysis of instabilities in tubes under internal pressure

A. H. M. KROM, R. W. J. KOERS and A. BAKKER 971 Hydrogen transport near a blunting crack tip

H. KIRCHNER 993 The force on an elastic singularity in a non-homogeneous medium

999 Erratum

1001 Announcements

I Keywords

Number 5

P. M. BLOMERUS, D. A. HILLS and P. A. KELLY 1007 The distributed dislocation method applied to the analysis of elastoplastic strain concentrations

H. G. BEOM 1027 Singular behaviour near a crack tip in an electrostrictive material

Y. A. ANTIPOV 1051 An exact solution of the 3-D-problem of an interface semi-infinite plane crack

V. TVERGAARD 1095 Effect of plasticity on cleavage crack growth resistance at an interface

A. WIKSTRÖM, P. GUDMUNDSON and S. SURESH 1113 Thermoelastic analysis of periodic thin lines deposited on a substrate

H. H. YU and Z. SUO 1131 An axisymmetric model of pore-grain boundary separation

D. A. S. MACDOUGALL and J. HARDING 1157 A constitutive relation and failure criterion for Ti6A14V alloy at impact rates of strain

J. P. NOBLE, B. D. GOLDTHORPE, P. CHURCH and J. HARDING 1187 The use of the Hopkinson bar to validate constitutive relations at high rates of strain

Number 6

K. RANJITH and J. R. RICE 1207 Stability of quasi-static slip in a single degree of freedom elastic system with rate and state dependent friction

G. SARMA and T. ZACHARIA 1219 Integration algorithm for modeling the elastoviscoplastic response of polycrystalline materials

H. GAO, Y. HUANG, W. D. NIX and J. W. HUTCHINSON	1239	Mechanism-based strain gradient plasticity—I. Theory
R. MASSABÓ and B. N. COX	1265	Concepts for bridged Mode II delamination cracks
B. J. LEE and M. E. MEAR	1301	Stress concentration induced by an elastic spheroidal particle in a plastically deforming solid
Q. D. YANG, M. D. THOULESS and S. M. WARD	1337	Numerical simulations of adhesively-bonded beams failing with extensive plastic deformation
M. WARNER	1355	New elastic behaviour arising from the unusual constitutive relation of nematic solids
H. G. BEOM	1379	Small scale nonlinear analysis of electrostrictive crack problems
S. A. NIXON and H. W. CHANDLER	1397	On the elasticity and plasticity of dilatant granular materials
	I	Keywords

Number 7

D. BIGONI and B. LORET	1409	Effects of elastic anisotropy on strain localization and flutter instability in plastic solids
H. X. ZHU and N. J. MILLS	1437	Modelling the creep of open-cell polymer foams
W. CHEN and T. SHIOYA	1459	Fundamental solution for a penny-shaped crack in a piezoelectric medium
A. J. LEVY and K. HARDIKAR	1477	The inclusion pair interaction problem with non-linear interface
S. PECULLAN, L. V. GIBIANSKY and S. TORQUATO	1509	Scale effects on the elastic behavior of periodic and hierarchical two-dimensional composites
R. MASSON and A. ZAOUI	1543	Self-consistent estimates for the rate-dependent elastoplastic behaviour of polycrystalline materials

N. HUBER and Ch. TSAKMAKIS 1569 Determination of constitutive properties from spherical indentation data using neural networks. Part I: the case of pure kinematic hardening in plasticity laws

N. HUBER and Ch. TSAKMAKIS 1589 Determination of constitutive properties from spherical indentation data using neural networks. Part II: plasticity with nonlinear isotropic and kinematic hardening

I Keywords

Number 8

D. KINDERLEHRER and D. E. MASON 1609 Incoherence at heterogeneus interfaces

S. WOOLFRIES and J. R. WILLIS 1633 Perturbation of a dynamic planar crack moving in a model elastic solid

J. E. HUBER, N. A. FLECK, C. M. LANDIS and R. M. McMEEKING 1663 A constitutive model for ferroelastic polycrystals

R. LIPTON 1699 Variational methods, bounds and size effects for two-phase composites with coupled heat and mass transport processes at the two-phase interface

P. MASSIN, N. TRIANTAFYLLIDIS and Y. M. LEROY 1737 On the stability of strain-rate dependent solids. I–Structural examples

Q.-C. HE 1781 Uniform strain fields and microstructure-independent relations in nonlinear elastic fibrouscomposites

E. MAZZA and J. UAL 1795 Mechanical behavior of a μm-sized single crystal silicon structure with sharp notches

Number 9

J.-B. LEBLOND and G. PERRIN 1823 A self-consistent approach to coalescence of cavities in inhomogeneously voided ductile solids

K. S. YI, B. N. COX and R. H. DAUSKARDT 1843 Fatigue crack-growth behavior of materials in viscous fluid environments

Y. BENVENISTE and T. MILOH 1873 Neutral inhomogeneities in conduction phenomena

Y. HUANG, W. WANG, C. LIU and A. J. ROSAKIS 1893 Analysis of intersonic crack growth in unidirectional fiber-reinforced composites

K. F. HANE 1917 Bulk and thin film microstructures in untwinned martensites

H. GAO, Y. HUANG, P. GUMBSCH and A. J. ROSAKIS 1941 On radiation-free transonic motion of cracks and dislocations

T.-L. SHAM, J. LI and J. W. HANCOCK 1963 A family of plane strain crack tip stress fields for interface cracks in strength-mismatched elastic–perfectly plastic solids

I Keywords

Number 10

T.-L. SHAM and J. W. HANCOCK 2011 Mode I crack tip fields with incomplete crack tip plasticity in plane stress

A. P. ROBERTS and E. J. GARBOCZI 2029 Elastic properties of a tungsten–silver composite by reconstruction and computation

P. GUDMUNDSON 2057 Acoustic emission and dynamic energy release rate for steady growth of a tunneling crack in a plate in tension

A. G. KOLPAKOV 2075 Variational principles for stiffnesses of a non-homogeneous plate

T. PARDOEN, Y. MARCHAL and F. DELANNAY 2093 Thickness dependence of cracking resistance in thin aluminium plates

C. Q. RU and X. MAO 2125 Conducting cracks in a piezoelectric ceramic of limited electrical polarization

V. K. KINRA, B. K. HENDERSON and K. I. MASLOV 2147 Elastodynamic response of layers of spherical particles in hexagonal and square periodic arrangements

M. V. NEBOZHYN and P. PONTE CASTAÑEDA 2171 The second-order procedure: exact vs approximate results for isotropic, two-phase composites

P. R. EVERALL and G. W. HUNT — 2187 Arnold tongue predictions of secondary buckling in thin elastic plates

2207 Addendum and Erratum

I Keywords

Number 11

V. B. SHENOY and L. B. FREUND — 2209 Necking bifurcations during high strain rate extension

C. CHEN, T. J. LU and N. A. FLECK — 2235 Effect of imperfections on the yielding of two-dimensional foams

Y. W. ZHANG and A. F. BOWER — 2273 Numerical simulations of island formation in a coherent strained epitaxial thin film system

A. L. ROYTBURD and J. SLUTSKER — 2299 Deformation of adaptive materials. Part I. Constrained deformation of polydomain crystals

A. L. ROYTBURD and J. SLUTSKER — 2331 Deformation of adaptive materials. Part II. Adaptive composite

S. X. MAO and M. Z. LI — 2351 Effects of dislocation shielding on interface crack initiation and growth in metal/ceramic layered materials

A. N. GALYBIN and SH. A. MUKHAMEDIEV — 2381 Plane elastic boundary value problem posed on orientation of principal stresses

Number 12

A. NEEDLEMAN and A. J. ROSAKIS — 2411 The effect of bond strength and loading rate on the conditions governing the attainment of intersonic crack growth along interfaces

V. STOLKARTS, L. M. KEER and M. E. FINE — 2451 Damage evolution governed by microcrack nucleation with application to the fatigue of 63Sn–37Pb solder

C. H. WU — 2469 The effect of surface stress on the configurational equilibrium of voids and cracks
